Challenge

In Search of Light

In early 2022, scandola faced the challenge of redesigning their upper floor. They needed office furniture that would cast the spaces in a bright and contemporary light while also being functional to meet the dynamic requirements of their business.

Solution

Three-Dimensional Visions

Schäfer Shop approached the project with its proven 3D planning approach. This method aimed to capture scandola's wishes and needs and create a planning proposal that meets both functional and aesthetic requirements.

The implementation was carried out through intensive consultation and support of the project by Schäfer Shop, from planning to installation. Special emphasis was placed on selecting bright furniture to cast scandola's spaces in a new light.
